Merkblatt 124 a

Daten sichern

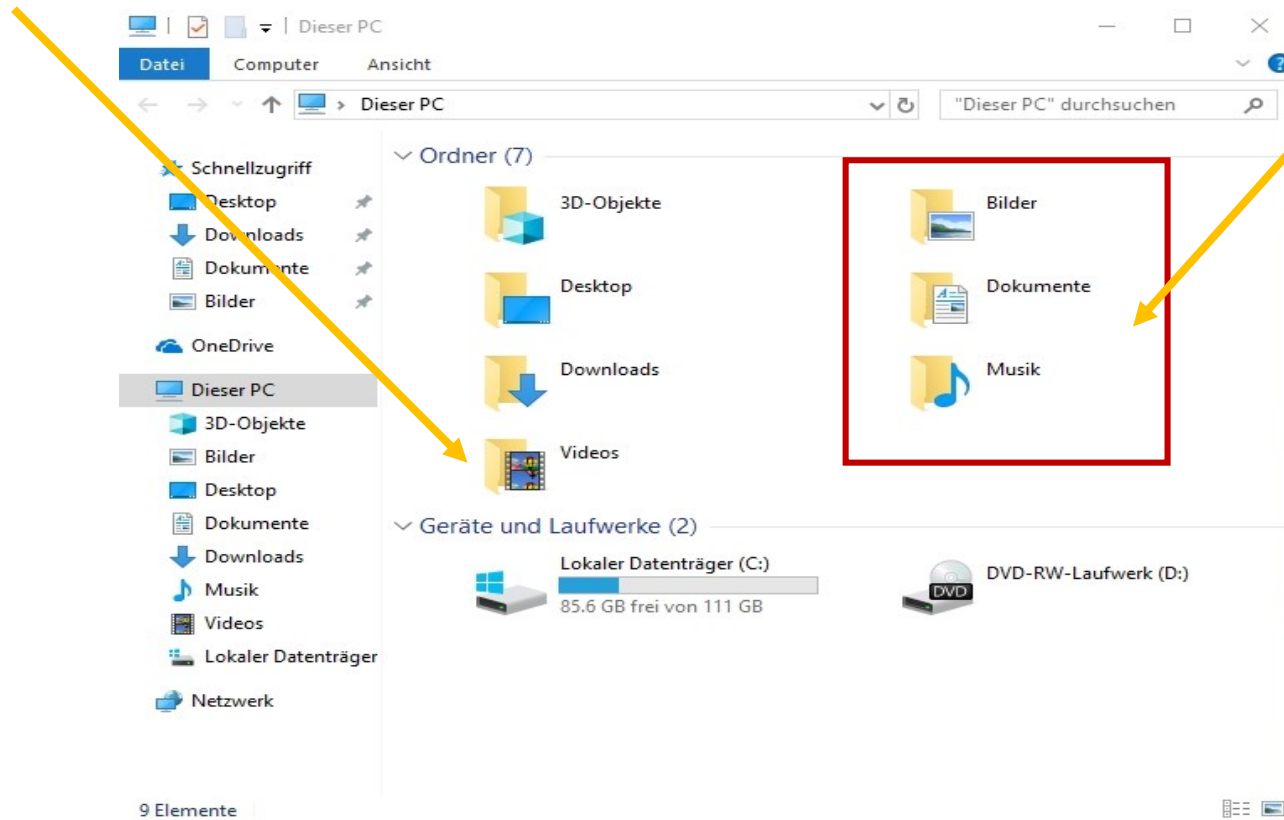

(bei wenig Daten)

April 2018 Manfred Peier

<https://www.computeria-olten.ch/beratung/merkblaetter-nach-themen/>

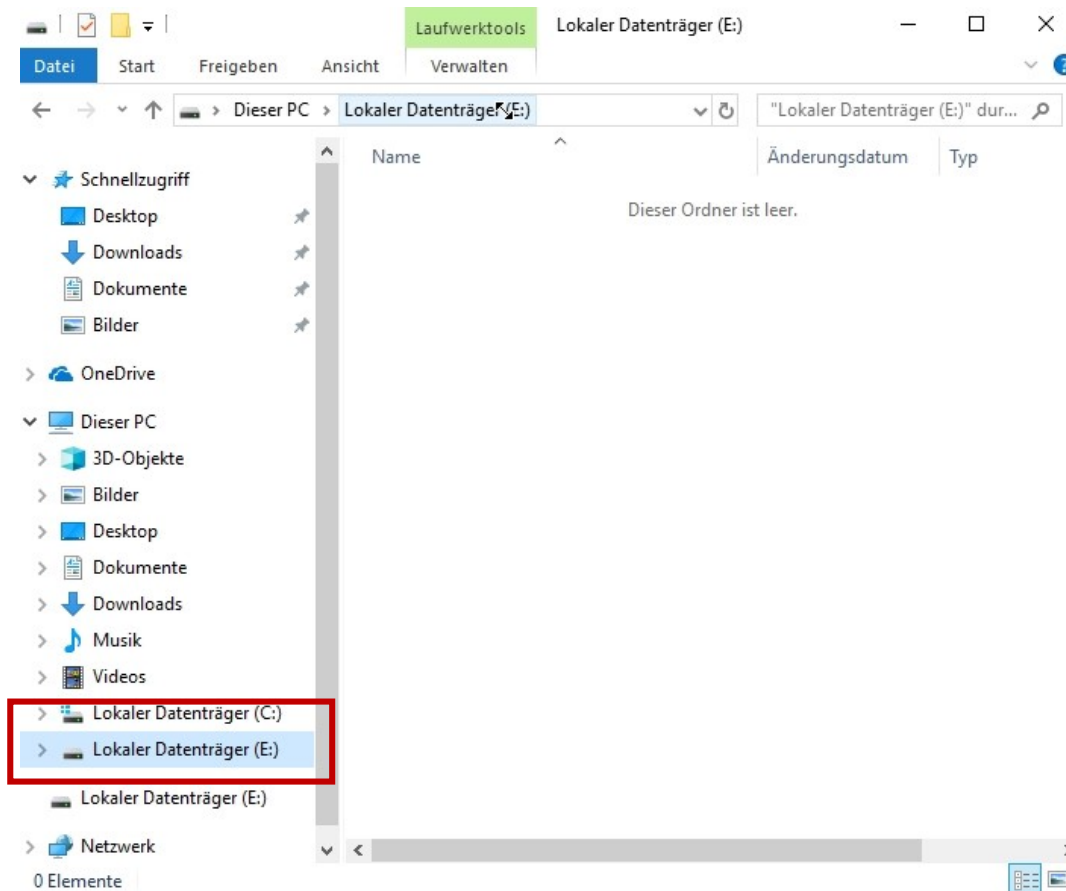

1. Möglichkeit bei wenig Daten

- Man muss wissen, wo die Daten sind

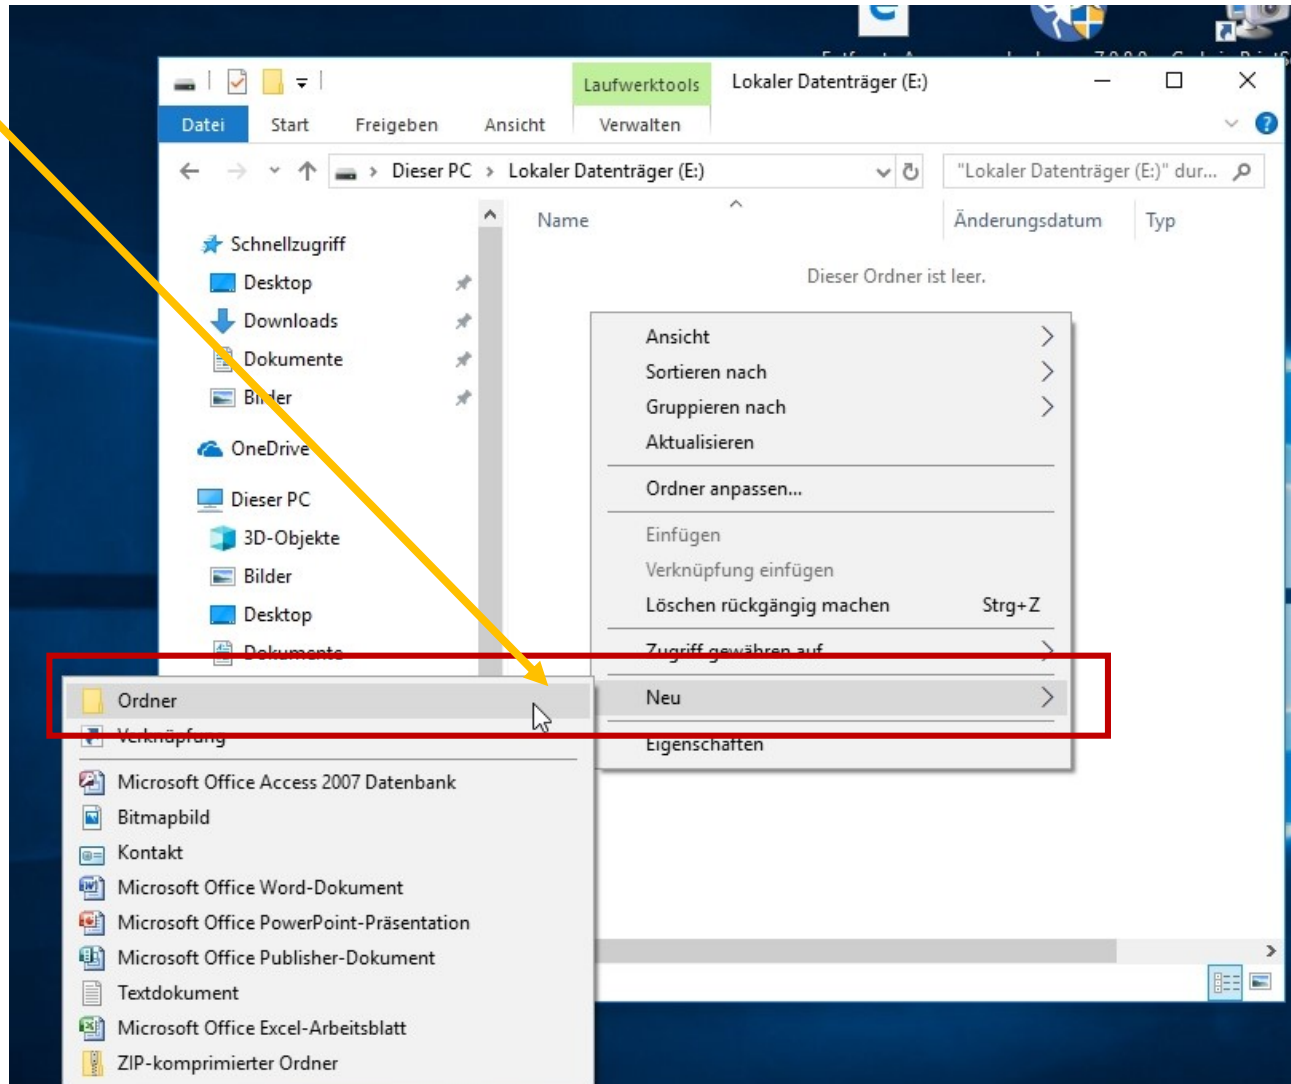

Sicherungsmedium erstellen

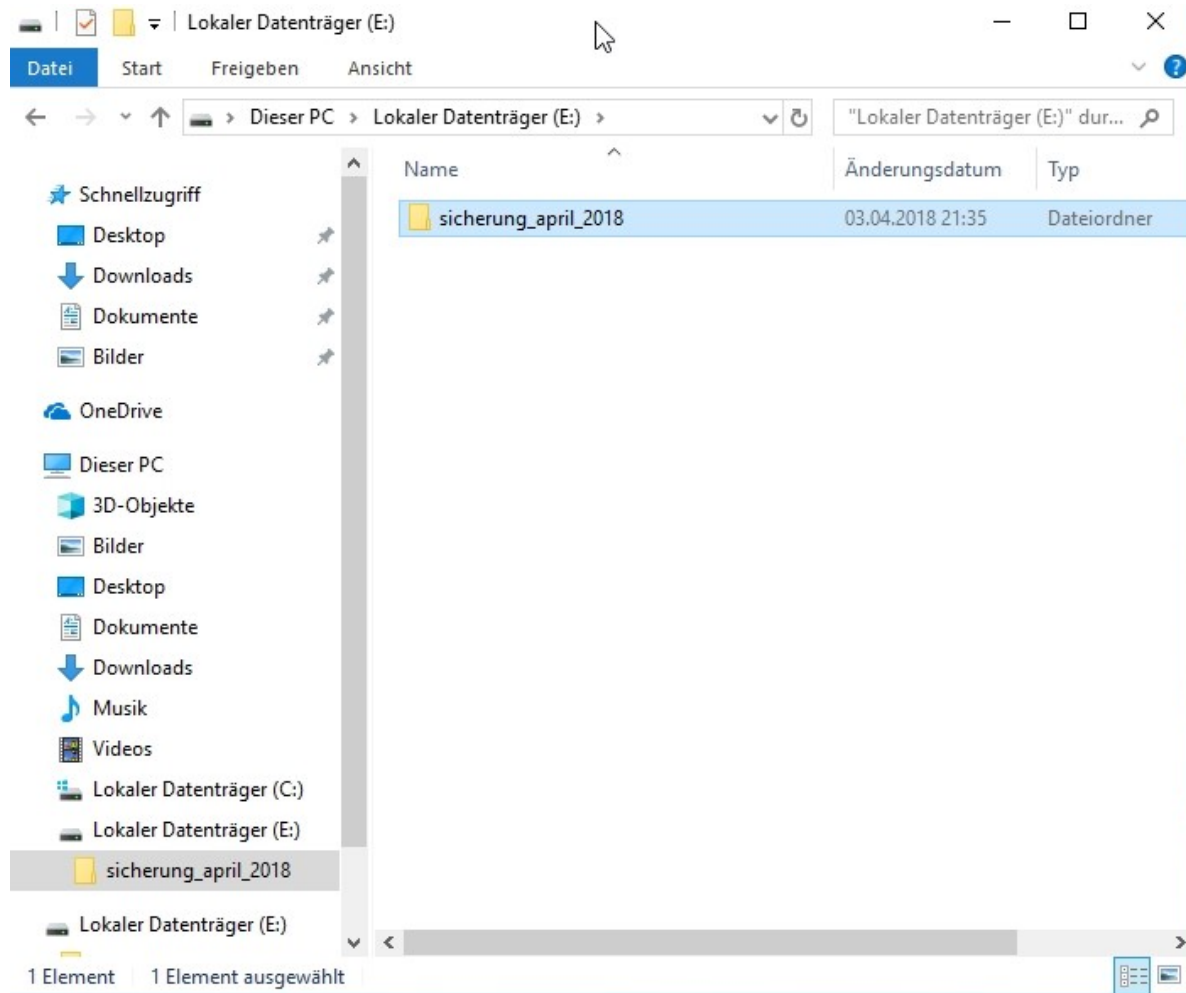

- Stick oder externe Festplatte

Sicherungsdatei benennen

Ordner benennen

Sicherung durchführen

The image illustrates the process of creating a backup of a folder in Windows. It consists of two side-by-side screenshots of the Windows File Explorer interface.

Left Screenshot: The File Explorer window is titled "Dokumente". The address bar shows the path "Dieser PC > Dokumente". The left sidebar shows the navigation pane with "Dokumente" selected. The main pane displays a single folder named "Daten_Peier", which is highlighted with a red rectangular box.

Right Screenshot: The File Explorer window is titled "Lokaler Datenträger (E:)". The address bar shows the path "Lokaler Datenträger (E:)". The left sidebar shows the navigation pane with "Lokaler Datenträger (E:)" selected. The main pane displays a table of files and folders. A folder named "sicherung_april_2018" is highlighted with a red rectangular box. The table columns are "Name", "Änderungsdatum", "Typ", and "Größe".

Table Data:

Name	Änderungsdatum	Typ	Größe
sicherung_april_2018	03.04.2018 21:35	Dateiordner	

A large blue curved arrow points from the "Daten_Peier" folder in the left screenshot to the "sicherung_april_2018" folder in the right screenshot, indicating the transfer of the backup.
